# Memorandum

7300/2  
NREAD

DATE: 23 January 1985

FROM: Director, Natural Resources and Environmental Affairs Division,  
Marine Corps Base, Camp Lejeune

TO: Communication - Electronics Officer, Comm-Elect Division, Marine  
Corps Base, Camp Lejeune

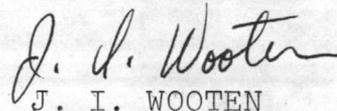

SUBJ: RADIOS WITH N. C. FOREST SERVICE FREQUENCIES; PROCUREMENT OF

1. As discussed during a 14 January 1986 telephone conversation between Gunnery Sergeant Frampton, Comm-Elect Office and Mr. Peter Black, Base Forester of this office, the following justification to procure radios with N. C. Forest Service frequencies is provided:

a. As a result of the severity of the 1985 Spring fire season, forest fire suppression units from private industry, U. S. Forest Service, U. S. Fish and Wildlife Service, N. C. Wildlife Resources Commission, N. C. Forest Service and U. S. Marine Corps we utilized in cooperative efforts to suppress forest fires. Communication was extremely important between these diverse agencies and their suppression equipment and personnel. Marine Corps Base, Camp Lejeune equipment and personnel did not have the capability to communicate with other units, which was detrimental to the suppression effort and placed all suppression crews working with U. S. Marine Corps equipment and personnel in additional and unnecessary hazardous situations.

b. It is anticipated that the cooperative efforts between the N. C. Forest Service, U. S. Forest Service and U. S. Marine Corps will increase considerably. Private industry has drastically reduced the amount of equipment and personnel available for forest fire suppression, and the failure of Champion International to renew its lease of the State-owned Hoffman Forest will reduce equipment availability.

2. If additional assistance is desired, please advise. The point of contact in this matter is Mr. Peter Black, Base Forester, and he can be reached by phone at extensions 1690/2083.
